ASSIGNMENT :9

CONSTRUCTOR AND DESTRUCTOR

```cpp
//c++ program to demonstrate constructor and destructor:
#include<iostream>
using namespace std;
int main()
{
    char op;

    int num1,num2;
    cout<<"enter operator either + or - or * or /or %:";
    cin>>op;
    cout<<"enter two operands:";
    cin>>num1>>num2;

    switch(op)
    {
        case '+':
        cout<<num1+num2;
        break;

        case '-':
        cout<<num1-num2;
        break;
```

```cpp
    case '*':
    cout<<num1*num2;
    break;

    case '/':
    cout<<num1/num2;
    break;

    case '%':
    cout<<num1%num2;
    break;

    default:
    //if the operator is other than +,-,*,/or%,error will be shown

    cout<<"error!operator is not correct";
    break;

    }
    return 0;
    }
```
